

Group Members: Krina Patel, Yash Patel, Shreyas Joshi and Huy Ngo

Github Linked: <https://github.com/shreyas1409/Capstone-Project>

- **Time and place of the meeting**

8:00 am, meeting conducted via Zoom

- **Who was present ?**

Professor Michael Melusky, Yash Patel, Krina Patel, Huy Ngo, Shreyas Joshi

- **What have you discussed with the faculty advisor?**

- Asked his thoughts on our github and frontend.
- Asked his opinion on which language we are going to use for the backend.
- Asked which database we should use.
- Asked his thoughts on how we divide the team and how we are going to process.
- Meetings will be conducted every other week.
- Asked his opinion on what part we should focus on first. He mentioned group members should divide work so two people can do frontend and other two can do backend.

- **What is his/her comment/feedback?**

- The Professor informed us that setting up a SQL database has associated costs to set it up online.
- Professor recommended we set up two teams to work on front end and back end and switch so that everyone gets experience working on all aspects of the project. Also recommended using two different repositories for front end and back end.
- Professor recommended various services that we can look into to set up our back end including Google cloud firebase, AWS and in Azure
- Professor discussed with us regarding backend languages and recommended what to use.
- Professor advised us on different ways to ensure a secure login process including some coding libraries and google authentication.
