

User case 001: Search bar

Basic course:

Where students can search for properties by entering zip code, state or by map. And while searching for property students can selection options where they can select square feet, budget price so on. Once students hit the search button it will show them their preferences they wanted to see. From there they can select the property they like and get for information.

Alternative course:

If students enter wrong information like zip code, state, it will show error message.

User case 002: Owner upload their property information

Basic course:

In owner account, owner can able to upload property information like when house or apartment was build, how many bedroom, bathroom are there, floor size(soft), rent price, features, contact information and photo of property.

Alternative course:

If owner enter wrong information about their property, in search bar it will show in wrong catalog and user can not able to find about the property.
